About TURKEY TRAININGS

Turkey Trainings offers a suite of learning opportunities on the most important topics and trends for professionals, experts, and life-long learners from around the world to enhance skills, broaden networks, and deepen thinking.

We work with top thinkers and doers from the high-ranked universities, institutions and premier industry resources from all across Turkey to offer cutting-edge analysis, highlight global trends, and lead discussions that open up new ways of thinking covering topics from Agriculture Training Programs to Women's Leadership Programs, to Tourism, ICT and Seafarers' Certifications; for a one-week to 6 months immersive learning experience.

In addition to regularly offered programs, Turkey Trainings offers customized programs that are tailored to the needs of public policy professionals in government agencies, institutions and the private sector.

Programs can range in duration from three days to one-week, and can take place in-country or at our venues.

About Piri Reis University

Our foundation, the Turkish Maritime Education Foundation (TUDEV), was set up to meet the need for Seafarers in Türkiye, to assist existing maritime education institutions, to activate an educational institution that trains seafarers, and to establish a university (when conditions allow) as written in the foundation deed and for this purpose, first of all, it gave the necessary financial support to Maritime Faculties and other maritime education institutions. This support still continues.

Our foundation established its own training center, TUDEV Maritime Training Center, in March 1995, and 2100 officers have been trained in this center so far.

At the extraordinary general meeting held on 4 December 2003, TUDEV decided that the Maritime Training Center would continue to serve as a “Turkish Maritime University” at the Higher Education level and started its studies.

After putting a lot of effort, T.C. PİRİ REİS UNIVERSITY, which gained legal personality with the law published in the Official Gazette on February 8, 2008, was founded to make contributions to Turkish and World Maritime.
